

## **Synology® Updates GPL Source Based on DSM 2.2 Version 0959**

(December 16, 2009) Synology® Inc. today updated GPL source based on its DSM 2.2 version 0959 to the open source community.

"This GPL source is released to match up with the recent Synology DSM 2.2 firmware update made in November," said Edward Lin, marketing director of Synology. "By releasing the GPL source, we hope to inspire the creativity of Synology's open source community."

### **Availability**

The most updated GPL source is available in CD format or free download. Information about CD request is available at <http://www.synology.com/enu/gpl/index.php>, and free download is available at <http://sourceforge.net/projects/dsgpl/>.
